LIFE ON THE MURRAY RIVER

Level: 7 & 8  
Activity: 1

Overview
The Murray River is a rich part of the Australian landscape. It flows for more than 2,500km, through three Australian states. Throughout history, the Murray River has been a source of food, trade and life sustaining biodiversity. During this activity, students will investigate how life on the Murray has changed throughout history and make some predictions about what it might look like in the future.

Resources
- Smartboard
- Computer access for students
- Appendix A: Murray River Today
- Appendix B: Looking Forward

Activity
ENGAGE
Show students Appendix A: Murray River Today on the smartboard. Discuss as a group:
- Who uses the Murray River today?
- In what ways is the river used?
- How would you describe our relationship with the river?
- What hazards do we need to consider when we are working/playing/living near the river?

Instruct students to draw a Venn diagram in their workbooks titled THEN & NOW. Give them some time to make notes in the NOW section about our relationship with the river and how we use it today.

EXPLORE
Students can now explore Murray River Aboriginals and add to their THEN & NOW any information they find about the role the river played in the lives of the Aboriginal Australians pre-colonisation. Encourage them to think about whether there are any aspects of the relationship that remain relevant today (eg. Fishing, swimming etc).

EXPLAIN
Discuss as a group:
- Are there any similarities between the relationship we have with the river today and that of people in the past?
- In what ways has it changed?
- What might this relationship look like in another 200 years?

ELABORATE
Give each student a copy of Appendix C: Looking forward. Students need to add to the image according to what they predict the Murray River will look like in the future. They should think about the way it might be used and cared for and incorporate this into their image.

EVALUATE
In pairs, students share their images, explaining their predictions and the reasons for their choice. Each student should respond to their partner with a compliment (about something they thought was interesting) and a suggestion (about something that could be improved).

**Sample Report Comments**

{Name} can explain some of the ways in which people’s relationship with the Murray River has changed over time. {He/She} used this information to make some predictions about what the river might look like and how it might be used in the future.
