

## Circular 027:02:08

**To:** Assessors                      Chief Instructors  
District Officers                      Club Secretaries

**Cc:** Regional Officers

**From:** Nicholas Demiris JP  
Director – Training & Assessment

**Date:** 29 February 2008

**Subject:** Water Safety Calculator

**Action:** Use calculator to assess needs prior to water-based training activities

The safety of our members must always remain of paramount consideration when planning, conducting and reviewing training activities. All Chief Instructors, Training Officers and other training personnel are reminded of Life Saving Victoria's Water Safety Policy, which includes a comprehensive water safety calculator.

The calculator provides specific equipment and personnel resources required to provide the minimum acceptable level of water safety for a given training activity that is water based.

Copies of the Water Safety Calculator are available via the LSV website (under 'Members – Club Information – Policies') or by clicking [here](#).

Members are reminded this calculator provides the minimum requirement and it is recommended to use an IRB for water-based activities.
