

Circular 119:10:08

To: Club Presidents
Club Captains
Club Secretaries
Lifesaving Managers

cc Regional Officers
State Officers
District Officers

From: Mark Scott
Director of Lifesaving Services

Date: 1 October 2008

Subject: Lifesaving Services Protocol

Action: Return completed Lifesaving Services Protocol by
Friday 7 November, 2008

Background

This Lifesaving Services Protocol has been developed to provide a common ground of understanding between LSV and the club in relation to the level of patrolling service which the Club is expected to provide. In consultation with LSV, it allows a club to plan and recommend the most appropriate patrol services required for their relevant area(s), taking into account incident histories, beach visitation numbers, local council requirements, climate and environmental factors and community expectation.

This Service Protocol forms a basis for LSV to monitor and review the delivery of volunteer lifesaving services by clubs throughout the season. The Protocol which has been agreed between LSV and each Club for a particular season can only be varied following written endorsement by LSV's Director of Lifesaving Services.

Operation of Protocol

By developing a Protocol for each Club, LSV is in a position to enhance its coordination of lifesaving services across the state and provide accurate patrolling information to the public and emergency services organisations. The Protocol is not intended to create binding legal obligations on the Club, rather is to be used to guide the delivery of volunteer lifesaving patrols throughout the state.

It is the responsibility of each Club to advise its patrolling members of their duties and the expectations of patrolling standards contained in this Protocol and LSV policies and procedures.

Highlights Responsibilities of Parties

LSV's Policies and Procedures define Patrolling Standards and Operational requirements for all lifesaving clubs. This Protocol highlights a number of specific club roles in conducting patrols, however these highlights do not supersede any policies or procedures, and are only included for information purposes.

As this Protocol document forms one aspect of the Club Administration Grant document, clubs are reminded that they need to have submitted an agreed signed copy to the LSV office in order to be eligible for the second grant payment. Clubs need simply sign off this document and send it in as confirmation of lifesaving services Protocol or alternatively present a case for patrol changes and times.

Reviewing Lifesaving Services Standards

The Lifesaving Services Protocol will be used as a mechanism to clarify and review a club's service levels, and to assist clubs to better understand their roles and plan for success. It will also enable the Council of Lifesaving Operations Executive to be able to identify areas that require focus and support and to develop future club programs and service requirements. Lifesaving Operations will also monitor club patrolling services by way of regular patrol efficiency audits.

Variance to Minimum Patrol Standards

Clubs which wish to alter patrol hours or patrol structure will need to present a case for the variance and preferably have reached initial agreement for the variance with the Council of Lifesaving Operations Executive or the Director, Lifesaving Services, Mark Scott, prior to submission of the Lifesaving Services Protocol.

Mark Scott can be contacted on 0409 159 341 or email markscott@wlsc.org.au

Given the possible repercussions should a member of the public be injured or drown in a time that was once patrolled or the club was operating outside the current standards or policies, LSV is requesting that the club follow the following procedures for any changes:

- i. The case for change must be first discussed in concept with the Lifesaving Services Support Officer Greg Scott or the Director, Lifesaving Services Mark Scott
- ii. The club must prepare a simple document which includes:
 - a. Current situation and proposed changes to patrolling situation
 - b. The rationale that the club has for changing its patrolling situation. Benefits to the public, members etc.
 - c. The club should include supporting evidence (eg population statistics) where statements are made.
 - d. Information on how the club will review the impact of the changes over the season

The intent of changing the patrol service is to better align with the public beach visitations and a better service to the public and is not a reduction in patrolling hours, rather a redistribution of hours and operation.

Any variance to the requirements or minimum standards of LSV's SOPs or Policies that may be proposed in the Lifesaving Services Protocol is not deemed to be in effect until the Lifesaving Services Protocol is completed and signed by all parties including the Director, Lifesaving Services, Mark Scott.

The club acknowledges that any changes will be initiated as a trial and reviewed over the season.

Departures from agreed Protocol

It is important that clubs inform LSVComms of any departures from the Protocol as they occur so as to ensure LSV has an accurate understanding of the resources available in all areas, and manage this when requested to task resources by other agencies such as the Victorian Police.

LSVComms has been tasked with forwarding information to relevant LSV personnel on matters relating to the late sign-on of patrols/services as well as failing to meet any other patrol/service requirements (as per the existing process). Any corrective action will be then undertaken through the following procedures.

- Procedure
 - Step 1 – LSVComms contacts Regional Officer
 - Step 2 – Regional Officer (RO) contacts club (President and/or Club Captain) - action immediately
 - Step 3 – If RO unable to get club to organise full patrol RO will contact LSVComms to put neighbouring clubs on alert
 - Step 4 – If repeated occurrence or not a one off – RO to contact Support Officers/Director for further action.

Ongoing departures from the Protocol

Will be reviewed by the Director, Lifesaving Services and (where necessary) in conjunction with the Patrol Review Panel with a view to assisting clubs maintain desired patrolling levels.

Patrol Review Panel

Role:

The Patrol Review Panel shall be formed to assist the Director, Lifesaving Services in reviewing patrol issues of clubs in accordance with each club's Lifesaving Services Protocol. The Patrol Review Panel shall be appointed and authorised by Council of Lifesaving Operations Executive to recommend remedial action in relation to a specific Club's patrol performance where appropriate.

Development:

The Patrol Review Panel shall be instigated at the request of the Director, Lifesaving Services and/ or the Council of Lifesaving Operations Executive in accordance with the LSV By-Laws. It is intended that this panel be comprised of the two (2) Council elected State Committee of Lifesaving Services representatives, a club president, a club captain, a life member and the relevant Regional Officer.

Guidelines:

The Director of Lifesaving Services shall establish guidelines to provide a fair and open communication channel between LSV and clubs to help ensure patrol related issues are resolved quickly, without ongoing impact to the level of service that is agreed.

These guidelines shall include appropriate action to be taken where clubs have departed from their agreed Protocol to varying levels – the objective being to provide appropriate support to the club to overcome any patrolling issues which it may encounter.

In the case of ongoing or significant departures from a Protocol by a club, the Director Lifesaving Services shall refer the matter to the Patrol Review Panel which will provide the Club an opportunity to present its views in relation to the departure(s) (either orally or in writing at the discretion of the Panel) before recommending an appropriate form of remedial conduct be implemented by the Council of Lifesaving Operations Executive.

Where a Club is dissatisfied with the determination of the Patrol Review Panel it may seek to have the matter referred to the LSV Board for an appeal hearing in accordance with the LSV By-Laws.

Adoption of Protocol

LSV and the club are each committed to the provision of quality volunteer lifesaving patrols throughout Victoria. In accordance with this objective, the Club Committee has adopted this Protocol to guide its provision of volunteer lifesaving patrols during the 2008/2009 season.

Once completed, clubs should send the Lifesaving Services Protocol to the LSV State Centre clearly marked for the attention of Greg Scott.

A copy of the LSV Lifesaving Services Protocol should be displayed in the Clubhouse/Patrol gear storage area where all active members can see it and ensure they are meeting the standards required within.

All other existing LSV processes and reporting structures will remain in place and this document supplements these LSV patrol procedures.

Attached to this Protocol is your club's current patrol hour/strength expectation for the 2008/2009 season which is based on previous seasons hours, and the dates of the full patrolling season. This is deemed as being the required patrol hours/strengths until completion and agreement of the Lifesaving Services Protocol.
