SUMMARY
Effective 1st October 2013, next month, SLSA have mandated the wearing of helmets for IRB patients in SLSA competition, competition training and events.

The use of helmets for IRB patients in IRB competition (both competition training and events) will be mandatory for all LSV affiliated clubs from the 1st October 2013.

Helmets permitted for use in IRB competition must meet the following requirements:

The predominate colour of the helmet is to be SLSA approved high visibility, which includes:
- Fluorescent Pink (PMS #16-2130 TN ‘Knockout Pink’)
- Fluorescent Yellow (PMS #13-0630 TN ‘Safety Yellow’)
- Fluorescent Green (PMS #13-0340 TN ‘Green Gecko’)
- Fluorescent Orange (PMS #15-1360 TN ‘Shocking Orange’)
- Fluorescent Red (PMS #485C)

The use of helmets by IRB patients, crew and drivers in frontline lifesaving training and operations is not currently mandatory. Best practice would indicate the use of helmets in all areas. Research is ongoing with a decision to be made in the near future.

APPROVED HELMET SUPPLIERS:
Current suppliers of EN 1385 approved helmets include:
