Event Name	<input type="text"/>		
Description	<input type="text"/>		
Participants	<input type="text"/>	Melways Ref	<input type="text"/>
Date Requested	<input type="text"/>	Time Requested	<input type="text"/>

Required action and additional information:

RPA's (Remotely Piloted Aircraft) 'Drones':

In line with Circular [091:11:16](#), the Westpac Life Saver Rescue Helicopter will not visit or patrol a location with RPA activity taking place. RPA's pose a significant threat to other aircraft especially when operating at low altitudes and without proper aviation communication systems in place.

I confirm that there will not be any RPA's operating at any time at the above location on the date requested.

Any RPA activity taking place at the location and date of an aerial services request without notification will impact on future visit requests and routine patrolling activity.

Should your club members be using or see members of the Public operating an RPA at a beach or coastal location, please notify LSVComms via 13SURF (13 7873), so they can advise the relevant helicopter services.

Signed by Club Committee Member
